Summary

## Time matters

Shorter design times and fast change cycles drive earlier and more product launches. Cut your development time in half with the following capabilities;

- Quickly find parts, documents, changes and files.
- In-process design review without distracting designers.
- Central and secure data prevents rework, damage or loss.
- Eliminate Bill or Materials errors and get real-time assembly cost roll-ups.
- Reuse approved designs for new product evolution.

Engineering change process from 33 days to 5 days - USA Medical Device Manufacturer.

75% improvement in time to market - UK gas appliance manufacturer.

**PDXpert** centralizes product data in a secure repository which you control. With simultaneous data access and configurable, workflows for all stakeholders, product release and change processes are seamless and fast.

Item dispositioning activities are easily identified and resulting costs calculated. Changes can be pulled back, reworked and resubmitted in simple steps. Automatic email notifications eliminates delays in collaboration.

Engineering efficiency will double with the right PLM.

-AMR Research, Inc

# Reduce Product Unit Costs

About 70% of product's lifetime production costs are established during development. With **PDXpert**, all product plans, drawings and procedures for procurement, production, inspection, service, repair and disposal are immediately available to stakeholders. Tailored, secure access to necessary information without distracting designers with on-going data requests optimizes collaboration and product costs.

PDXpert encourages and simplifies parts re-use leading to radically reducing inventory costs, retooling expenses and supply chain volatility.

A full audit trail of all changes to the BOM, how affected items were dispositioned, associated costs and change workflows ensure that production modifications are reviewed and approved prior to release, slashing production rework and scrap.

Comprehensive yet less intrusive collaboration.

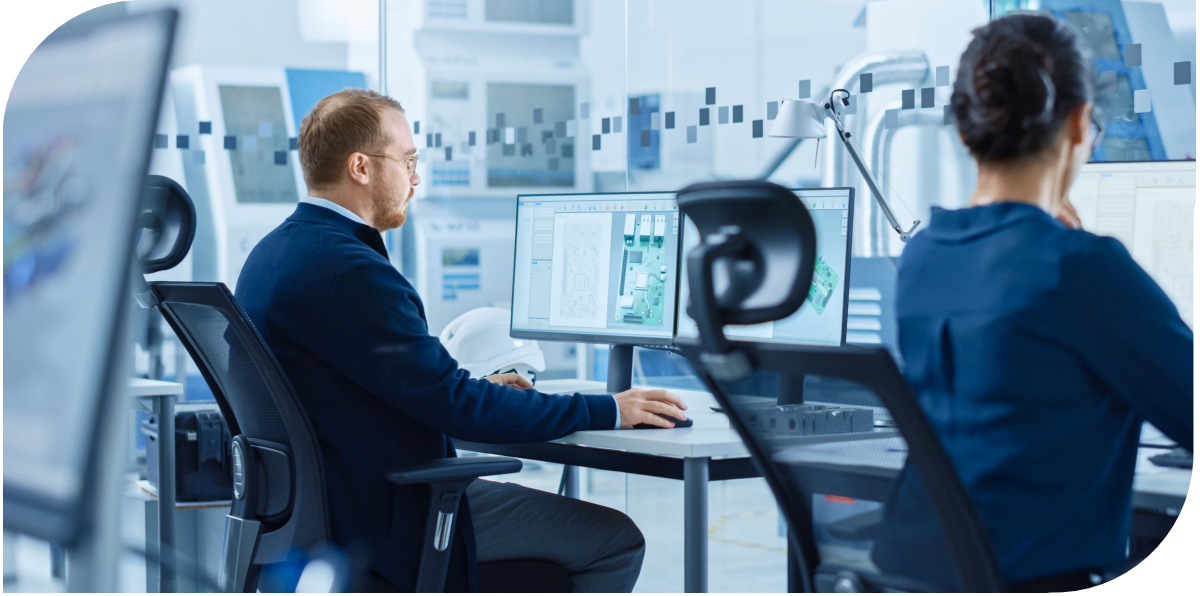

Minimize excess & obsolete inventory. Cut expense by 80%.

## Avoid costly mistakes

Number	Rev	Description	Quantity
987761	C	Circuit board, 2 side	1
762445	F	Diode, 1A thru-hole	2
345291	A	Resistor, 470mm, 1W	3
0166			1
3241			2
4822			3
4299			1
5200			6

JG, the part number doesn't match this description!  
And is this revision correct?

## Minimize Administrative Overhead

PDXpert PLM software supports best practices developed by companies subject to ISO 9000, ISO 10007, FDA Part 820, EIA/IS-649, and MIL-HDBK-61 requirements.

Managing and communicating product data is expensive: copying, emailing, updating spreadsheets, tracking changes, mailing quote packages – the list is endless. A manual control and change management process can require a small army to carry out.

PDXpert PLM's data management, workflow and email notification reduce the paper chase and enforce a well-controlled process. Users can perform more tasks in less time, freeing your current staff to do more important things than push paper.

# Why you'll love PDXpert® PLM

## Simple to learn, simple to use

PDXpert product lifecycle management software has been designed by engineering, manufacturing, and software professionals with one goal: deliver a simple, comprehensive PLM solution. And we've done this without making PDXpert complicated to set up, difficult to evaluate, or expensive to purchase.

## Flexibility for growing companies

PDXpert has built-in configurable workflows and extensive customizable properties to give full control to prescribe preferred practices for a wide variety of industries: industrial electronics, machinery manufacturing, consumer electronics, medical devices, automotive, aerospace, process industries, etc.

## Protection for your intellectual property

PDXpert puts your mission critical intellectual property (IP) which is developed during design, validation and production easily accessible to authorized users and always protected from human error (or worse).

*I am amazed by the clarity and simplicity of PDXpert. I have worked extensively on ENOVIA and SmarTeam, but I appreciate the architecture of PDXpert.*

*Vikash S. PLM Team Lead. PSP Ltd.*

PDXPERT® PLM

## Summary

PDXpert is the simple, no-hassle PLM software experience

- What you see is what you get: **easy-to-understand product features**
- The software is typically **onboarded with your data in a day**
- A **fully-functional PLM evaluation system** that you can download and try out using your company's own product data, rules and workflow
- **You own and control your data**, not a cloud or software vendor
- **Published prices** with attractive discounts
- **Convenient, flexible licenses**: perpetual or subscription
- Friendly, **honest advice** on how PDXpert PLM software will work in your application, without a sales pitch
- Configuration, legacy **data conversion and training services** only when you need them
- **Straight-forward user interface** for easy administration and user productivity
